

## Nick's Practical Reloading Book

Our own technical editor Nick Harvey recently released his new Practical Reloading Manual with new and revised data. Now his 10th Edition, it's packed with data for both the rifle and pistol enthusiasts and also contains many popular "Wild Cat" and improved cartridges. This book features chapters like "Gear and Tips For Getting Started In Handloading" for the novice and all you'll need to know about a wide range of related subjects including Bullet Seating, Care and Preparation of Brass Cases, Choice of Propellants and lots, lots more.

Nick also offers lots of advice and "How To's" in this well prepared book, which also features a large selection of images. These including re-loading gear and a variety of hunting trophies he has taken over the years, as choosing the correct bullet for various game is also an important consideration. Add to all this, his long list of calibers, each with a selection of suited bullet weights, recommended powder charges and their respective muzzle velocities. As always, Nick demonstrates caution when reloading and advises a starting and maximum charge for each caliber

while ensuring the best possible performance and accuracy.

I've always found Uncle Nick's reloading manuals a lot more suited for us Aussies than most American reloading manuals as his book covers our powders and reloading gear that's available here in Australia. Easy to follow and extremely informative, Nick Harvey's Practical Reloading Manual-10th Edition is a must have for the novice or experienced reloader.

## Bistoli – Storm Shield

Teznic Australia offer a range of innovative products to suit hunters, shooters and gun enthusiasts. Firstly, their optics range include binoculars, rifle scopes and even scope rings, all designed, engineered and assembled by King Optics in Canada. Another innovative product range from the boys at Teznic is the Bistoli accessories line that includes slings, bags, cartridge holders and a large selection of gun cleaning gear.

One product that caught my eye, however, was Bistoli's Storm Shield Gun Cover. When out hunting I couldn't tell you how many times I've been caught out in the rain and at times, snow and cursed the fact that my firearm and scope were getting wet. The Bistoli Storm Shield is made for those situations and will protect your firearm and optics from rain, snow, dust and scratches when in the field, yet provide quick and easy access to your firearm when required without having to un-zip and remove from a gun bag.

Unlike a gun case or bag, this cover is open along one end which allows you to shoulder your firearm via its sling yet offers protection from the elements. If and when you need to take a shot, simply un-sling off your shoulder, remove the cover and shoot. Made of a rip-stop fabric, the Storm Shield is suitable for firearms 39" to 56" in length, is scope compatible and thanks to an adjustable draw chord, compact and very lightweight. This innovative idea is born from experiences in the field and obviously made by hunters for hunters. Whether you're travelling on a quad bike out on the dusty flats, backpacking into remote areas, or simply wish to protect your firearm from the elements when out bush, the Storm Shield will have your firearm covered. Available in Sand, Black or Digital Camo, the Bistoli Storm Shield retails for around \$55.00.
